

LIPSafeguard

3D Workspace Safety Monitoring System

1) The smart 3D sensor continuously monitors and prevents people accessing to 3D virtual space where is preset as danger or observed zones

- Adopting LIPS® 3D Body Skeleton as the body movement identification core to reduce changes of false alarm

2) With LIPSafeguard CMS, you can easily setup the smart 3D sensor from your desktop

- Free to define danger/observed zones
- Real-time monitoring status of the smart 3D sensor

3) Adopting LIPSafeguard System in versatile industries

- Automatic manufacturing plants
- Co-bot workplace or machine tools
- Computer facilities, engine rooms or electric machine rooms
- Public areas, such as airport, stations, exhibition centers or museums
